While rolling measurement produces a more stable calculation, trends of improvement will be slow to appear. *notes on the data*

**SCI Reports:** Counts of reports processed by SCI come from the FACTS system via the sm01a10 report. "Repeat Referrals" is defined here as any report involving a family who has 3 or more prior reports, identified in the sm01a07 report. Percentage of "repeat referrals" is calculated as follows:

<b>Numerator:</b>	Reports involving a family with 3+ prior reports
<b>Denominator:</b>	Total accepted reports

**Pending Investigations:** Counts are pulled from ROM on the last day of each month. The totals are shown above each column.

**Completed Investigations:** These data are pulled from ROM and include a total of all investigations closed during the month. Percentage of cases substantiated is shown as an unlabeled line on the secondary (right-hand) axis. This percentage is calculated as follows:

<b>Numerator:</b>	Substantiated investigations
<b>Denominator:</b>	Total completed investigations

**Foster Care Entries, Exits, and Short Stays:** These data come from ROM. Both entries and exits exclude short stays, which are defined as foster care episodes lasting 8 or fewer days.

**Children in Care by Placement Type (last day of month):** These data are pulled from ROM and visualization is focused on relative placements. The category of "other" includes congregate care settings, runaways, children on trial home visits, and children in pre-adoptive homes. A greater level of detail can be

**Placement Moves and Initial Relative Placements:** These data are calculated through ROM. The placement moves rate shown in this chart is a month-to-month rate, rather than the rolling 12-month measure included as a federal indicator. Percent of all entries is calculated with short stayers included. These measures are calculated as

<b>Initial Relative Placements</b>		<b>Placement Moves Rate</b>	
<b>Numerator:</b>	Children placed with relatives at removal	<b>Numerator:</b>	Moves from one placement to another in the month
<b>Denominator:</b>	Children placed in care for any length of stay	<b>Denominator:</b>	Total days in foster care during the month by all children in care

**x 1000**

**Children with a Plan of Adoption:** These data, which come from ROM, are intended to track statewide progress addressing adoption and TPR backlogs. Generally, we hope to see the distribution of children with an adoption goal skew more toward the top of the column. We have seen some steady progress on this issue thanks to numerous efforts around the state.

**Caseworker Visits:** Caseworker visits with children are displayed in ROM in two reports: One showing a point-in-time count of completed visits, and one showing a historical percentage of completed visits for previous months. At this time, there is no ROM report that captures worker-parent visits. These percentages are calculated twice each month using FACTS report sm0809. The report is run one week prior to the end of the month, and again one week after the end of the month. Data presented in this document are based on the latter. The percentages are calculated as follows:

<b>Worker-Child Visits</b>		<b>Worker-Parent Visits</b>	
<b>Numerator:</b>	Number of children with a visit during the month	<b>Numerator:</b>	Number of parents visited in their place of residence during the month
<b>Denominator:</b>	Children in foster care for the entire month	<b>Denominator:</b>	Parents of children in custody with a court-ordered or recommended plan of

**Providers:** PS continues efforts to recruit and retain a diverse pool of foster parents to meet the needs of our children in care. Data used for this reporting is obtained from the FACTS report pm02a01. Foster parents who are newly licensed or no longer providing services are identified through month-to-month comparison of this

**Turnover & Vacancy Rates for Key PS Field Positions:** These data are obtained from PS human resources. For this report, turnover and vacancy are presented for key county-level field positions: Investigations, Permanency Planning, and Placement workers and senior workers. Supervisors are excluded. A broader turnover calculation is reported quarterly to the Legislative Finance Committee. The positions included here drive turnover and vacancy at the county level, and staff retention for these positions is crucial for casework continuity and

<b>Vacancy Rate</b>		<b>Turnover Rate</b>	
<b>Numerator:</b>	Number of vacancies (last day of month)	<b>Numerator:</b>	Rolling 12-month sum of voluntary staff separations
<b>Denominator:</b>	Total number of positions	<b>Denominator:</b>	Rolling 12-month average number of filled positions

**Estimated Caseloads:** These are calculated using data from ROM, FACTS reports, and PS human resources. Each caseload calculation is based on a different definition of "case," depending on the position. Investigation caseloads are calculated using new reports that come in during the month (divided by number of investigators); permanency planning caseloads are based on the number of children in foster care during the month (divided by number of PPWs); and placement caseloads are calculated based on the number of provider families, including ICPC families residing in-state (divided by number of placement workers). The Child Welfare League of America has established maximum caseload standards, which are included in the chart legend.

**Repeat Maltreatment:** This measure is calculated for us in ROM and is a federal reporting measure that uses a 12-month rolling reporting period. Because the children in the denominator experienced their initial incident of maltreatment (substantiated allegation) at least one year ago, improvement on this measure can take some time to show in the data.

<b>Target: ≤ 9.1 %</b>	<b>Numerator:</b>	Of the denominator, number of children who had another incident of maltreatment within 12 months
	<b>Denominator:</b>	Number of unique children who experienced maltreatment during the 12-month target period (12-23)

*notes on the data (continued)*

**Maltreatment in Foster Care:** This measure is calculated for us in ROM and is a federal reporting measure that uses a 12-month rolling reporting period. It calculates a rate of maltreatment for children in foster care based on when they are in foster care, regardless of the perpetrator's relationship to the child. The rate is based on 100,000 foster care days.

<b>Target: <math>\leq 8.5</math></b>	<b>Numerator:</b>	Number of substantiated reports pertaining to children included in the denominator calculation	<b>x 100,000</b>
	<b>Denominator:</b>	Number of total days spent in foster care by the population of foster children in a rolling 12-month period	

**Permanency in 12 Months of Entry:** This measure is calculated for us in ROM and is a federal reporting measure that uses a 12-month rolling reporting period. It uses an entry cohort of children in foster care that goes back a few years so that its companion measure, foster care re-entries, can be calculated using the children in this numerator as the latter measure's denominator. As such, practice improvements pertaining to this

<b>Target: <math>\geq 40.5\%</math></b>	<b>Numerator:</b>	Of the denominator, children for whom permanency (reunification, adoption, or permanent guardianship) is achieved within 12 months
	<b>Denominator:</b>	Number of children who entered foster care (excluding short-stayers) during the 12-month period ending two years before the current

**Permanency in 12 Months for Children in Care 12-23 Months:** This measure is calculated similarly to the one above, only this measure's "entry cohort" includes children who have already been in foster care for 12-23 months at the start of the target period. This measure helps us assess our ongoing efforts to achieve permanent outcomes for children for whom we do not do so within the first year.

<b>Target: <math>\geq 43.6\%</math></b>	<b>Numerator:</b>	Of the denominator, children for whom permanency (reunification, adoption, or permanent guardianship) is achieved within 12 months
	<b>Denominator:</b>	Number of children who had been in foster care for 12-23 months at the start of a rolling 12-month period

**Permanency in 12 Months for Children in Care 24+ Months:** This measure is calculated similarly to the ones above, only this measure's "entry cohort" includes children who have already been in foster care for 24 months or more at the start of the target period. This measure helps us assess our ongoing efforts to achieve permanent outcomes for "long-stayers," a group that often includes children with complex needs.

<b>Target: <math>\geq 30.3\%</math></b>	<b>Numerator:</b>	Of the denominator, children for whom permanency (likely adoption or permanent guardianship) is achieved within 12 months
	<b>Denominator:</b>	Number of children who had been in foster care for 24+ months at the start of a rolling 12-month period

**Placement Moves Rate per 1,000 Days of Foster Care (Rolling 12 Months):** This is the federal version of the less stable monthly placement moves rate calculation. It uses a rolling 12 month period of measurement, but is calculated the same way. Due to the 12-month time period, initiatives intended to improve placement stability will not impact this outcome very quickly; short-term assessment would be better served using the monthly calculation.

<b>Target: <math>\leq 4.12</math></b>	<b>Numerator:</b>	Number of placement moves	<b>x 1,000</b>
	<b>Denominator:</b>	Total days in foster care during the rolling 12-month period (ending with the current month) by all children in care
